

## ADVICES IN CASE OF SUSPICION OF RENAL COLIC

You have been treated in our medical center, and the diagnostic of a renal colic crisis was made. You can go back home, but we ask you to respect the followings recommendations:

1. Continue the treatment as prescribed, don't change doses without medical advice.
2. Sift the urine through a coffee filter: keep all eliminated stones that you make, and bring it to the next consultation.
3. Drink normally all day long
4. Check your temperature every morning

Consult a doctor in case of :

- Fever
- Chills
- Vomitting
- Reapparance or modification of the pain
- Malaise
- Red urine
- Lack of urine during 24 hours
