

## TAKING CARE OF A DRESSING

We recommend you to remain under the supervision of the doctor who took care of you today, for the rest of your treatment.

- The dressing should be changed in ... days, unless you are worried about anything
- If you've had stitches, we have to remove it in ... days
- The validity of tetanus vaccinations will eventually be checked by the doctor within 24 hours.

Please also consult your doctor if you:

- Have unrelieved pain by analgesics
- Have a bleeding
- Have signs of infection
- Have an edema
- Have abnormal skin color (red, blue or white)
- Have abnormal sensations (numbness, tingling, reduced sensitivity)
